

# The new GIGA X8 – 4x more professional

Whether you opt for a flexible mobile solution with large water tank (GIGA X8) or a permanent water connection (GIGA X8c), when only the best is good enough, it never fails to deliver.

The completely new inner workings of the GIGA X8 mean that it is now more robust, efficient, intelligent and even easier to service.

The dual spout is designed with the needs and requirements of professional users in mind.

The dishwasher-proof drip tray can easily be removed and emptied with just one hand.

The touch display is intuitive and simple to operate while enabling maximum flexibility.

2 precision ceramic disc grinders with Automatic Grinder Adjustment (A.G.A.®)

**SPEED**

Speed function thanks to  
additional hot water  
bypass

32 different specialities can be programmed

Automatic milk system cleaning

STEELE

Pulse Extraction Process (P.E.P.®)

Intelligent Water System (I.W.S.®)\*

\*with GIGA X8. For the GIGA X8c with permanent water connection, we recommend the JURA water-filtering system.
