## A world first: The groundbreaking Z10 with P.R.G. for hot and cold brew speciality coffees

- Product Recognising Grinder (P.R.G.) with ultra-fast automatic grinder adjustment for every speciality coffee
- Cold brew speciality coffees at the touch of a button thanks to the innovative Cold Extraction Process
- Eighth-generation brewing unit with 3D brewing technology for the ultimate aroma experience
- High-quality all-round design with convex-concave front panel, water tank in wave design and beautifully finished details

### The new Product Recognising Grinder (P.R.G.)

With the Z10, the optimum grinder setting for each individual speciality coffee is programmed in the factory settings.

- The Product Recognising Grinder now automatically switches to this pre-defined consistency of grind for each preparation – much faster than could be done manually.
- Thanks to Aroma Selection, the consistency of grind can be individually adjusted to suit personal preferences before every preparation.
- The consistency of grind ranges from very fine for short classics to very coarse for cold brew or long specialities.

### Cold brew – extreme freshness

Thanks to the cold extraction process, the Z10 now creates nine cold brew speciality coffee to perfection. There's something for every taste: from cold brew espresso or espresso doppio to the trendy cold brew flat white.

#### Extraction takes place

- with cold water.
- pulsed at high pressure.
- with coarser ground coffee.

#### The result in the cup

- is natural and energising.
- makes the most of the fruity aromas.
- is not spoiled by bitters.

#### Tips for the perfect cold brew coffee

- Fill the water tank with cold water.
- Choose beans with a fruity note.
- Always pour cold brew coffee directly over ice.

### Eighth-generation brewing unit

The brewing unit is the most important part of any automatic coffee machine. The Z10 features the newly designed eighth-generation brewing unit.

- The unique 3D brewing technology allows the water to flow evenly through the ground coffee at multiple levels.
- This ensures maximum aroma for both hot specialities and cold brew coffee.

### Lasting elegance

- The complex convex-concave aluminium front panel demonstrates the very highest standard of craftsmanship.
- A water tank in an elegant wave design with harmonious filter casing.

### Luxury at its most refined

- In the Signature Line, JURA uses solid 3 mm-thick aluminium for the front and top sections.
- A cup grille made of heavy, chrome-plated, die-cast zinc completes the distinguished look of the Z10 Signature Line.
